JavaScript • ReactJS • Express • MaterialUI • MongoDB • Bulma

## PROJECTS

**Farm to Table** | Deployed: [http://bit.ly/f2t\\_deploy](http://bit.ly/f2t_deploy) GitHub: [http://bit.ly/f2t\\_github](http://bit.ly/f2t_github)

- Summary: Allows for a farmer to input the produce they have to sell. A user then creates an account, browses through the produce and reserves the produce they would like.
- Formulated the products page using React to display all products the admin created, styled the product card using Bulma framework and designed the scheme to allow the user filter product cards
- Built out the contact page and form incorporating JavaScript and React and integrated Nodemailer for admin to receive an email when customer fills out contact form.

**BarkMatch** | Deployed: <http://bit.ly/barkmatch> GitHub: <http://bit.ly/BarkMatchgithub>

- Summary: Application that allows volunteers to sign up and walk a dog as well as dog shelters to input, edit and delete their dogs to be walked.
- Developed back end controllers, models, and routes for the volunteer using jQuery and MySQL to allow a volunteer to choose a specified dog that shows is available to be walked.
- Using the Bulma framework, created a card telling the volunteer next steps after reserving a dog.

**SearchU** | Deployed: <https://bit.ly/searchU> GitHub: <https://bit.ly/searchUgithub>

- Summary: Site for prospective college students to obtain information of the institution and quality of life in the location they are searching.
- Created and implemented the back end API call using Teleport API for the quality of life widget based on the city or college searched allowing the prospective to find vital information based on their inquiry.
- Assisted in incorporating Bootstrap and CSS properties to overall UX/UI design of the website.

## EXPERIENCE

**Generation: You Employed, Inc**

**Rochester, NY**

**Teach Assistant**

**2020-present**

Key Accomplishments:

- Monitor class of 70 students' progress and assist students in accomplishing established learning objectives related to software development, from git commands to learning JavaScript and Java.
- Effectively control attendance, assignments, and grading to excel in operational skills.

**The Home Depot**

**Acworth, GA & Rochester, NY**

**Pro Associate/MET Associate**

**2020-present**

Key Accomplishments:

- Built personal accountability by setting weekly and monthly goals for managed accounts to build business to +\$500,000 within 5 months.
- Displayed well-orientated professional knowledge to increase personal sales for monthly average of \$125,000 by creating customized in person and phone quotes and in store sales.
